

HALO Account and Balance Guide

Generated for HALO demo source retrieval.

Prototype note: HALO is fictional demo content modelled on UK digital current-account guidance.

Check my balance

For the demo account, Alex Rivera's available balance is GBP 4,212.86 in Everyday Current Account. Savings Pots total GBP 11,940.02. Pending card activity of GBP 58.20 has not yet posted and is not included in the available balance.

The main available balance is the amount used to decide whether card payments, transfers, Direct Debits, and standing orders can go through. Money in Pots or savings spaces belongs to the customer but does not count as main available balance until it is moved back.

The customer can view the latest balance, transaction feed, scheduled payments, monthly statements, and Pot balances in the HALO app. HALO sends instant notifications when money is spent or received.

Deposit protection

Eligible HALO deposits are protected by the UK Financial Services Compensation Scheme up to the applicable statutory limit per eligible depositor. The protection applies to qualifying deposits held with the authorised bank partner, subject to FSCS eligibility rules.

If a customer asks whether savings are safe, explain that money in current-account balances and savings spaces may count toward the same compensation limit when held with the same protected institution.
