

HALO Cards, PIN and Security

Generated for HALO demo source retrieval.

Prototype note: HALO card support is fictional, but follows common UK digital bank card-security patterns.

Lost or stolen card

If a card is lost, stolen, damaged, or used for transactions the customer does not recognise, the customer should freeze the card immediately in the HALO app and tell HALO as soon as possible.

To replace a lost or damaged card, go to Home > Card > Freeze, then choose Order a new card and select the reason for replacement. If the card was stolen or fraud is suspected, choose I've been a victim of fraud or theft.

If the customer cannot access the HALO app, they can use HALO Web to freeze the card, or contact support by phone or email. The virtual card can remain available for online payments if HALO has not cancelled it for security reasons.

HALO does not charge for replacement cards that expire, arrive faulty, are stolen, are swallowed by an ATM, or are cancelled because HALO is concerned about fraud. HALO may charge GBP 5 for replacement cards that are lost or damaged after the free replacement allowance. Replacement cards sent outside the UK may cost GBP 30.

Reset my PIN

If a customer forgets their PIN or enters the wrong PIN too many times, they can recover or reset the PIN in the app. Go to Card, choose Reveal PIN or Reset PIN, then complete identity checks such as biometric confirmation or a short selfie video.

HALO will never ask for the customer's PIN, full card number, or three-digit CVC in chat, email, or by phone. The customer should keep the PIN secret, even from HALO staff.

After identity verification, HALO can show the PIN reminder or unblock PIN use. ATM and card-network systems can take up to 30 minutes to reflect a PIN change or unblock.
