

HALO Payments, Limits and Fees

Generated for HALO demo source retrieval.

Prototype note: HALO payment rules are fictional, but the structure is inspired by UK digital bank payment terms and fee schedules.

Transfer limits

The standard daily transfer limit is GBP 25,000 for external UK bank transfers and GBP 50,000 between the customer's own HALO accounts. Limits reset at 00:00 UK time each day.

Customers can see their current payment limits in Settings > Limits. Limits may change over time for security, risk, regulatory, or account-history reasons. HALO may also pause or refuse a payment if instructions are unclear, if a payment goes over the customer's limits, if fraud is suspected, or if a legal or regulatory rule requires it.

A temporary transfer limit increase can be requested in Settings > Limits. HALO may ask for extra verification before raising a limit.

UK payments

Sending money within the UK by bank transfer is free. Faster Payments usually arrive instantly, but can take up to 2 hours. Other bank transfers usually arrive within 1 working day but may take longer for technical, fraud, legal, or regulatory checks.

To make a UK bank transfer, the customer needs the recipient's name, sort code, account number, and account type. The customer may approve the transfer with a PIN, security code, fingerprint, or face recognition.

Wire transfer fees

HALO uses the phrase wire transfer for international bank transfers and foreign-currency payments. UK transfers cost GBP 0. International wires show the exchange rate, estimated arrival time, fixed fee, and variable fee in the app before confirmation.

The fixed fee for an international wire is no more than GBP 9. The variable fee is between 0% and 1.80%, depending on destination, currency, route, and payment partner. The exact fee must be shown before the customer approves the transfer.

Incoming payments in GBP are free. Incoming EUR or other foreign-currency payments are converted to GBP before they appear in the account and may have a 1% conversion fee

capped at GBP 1,000. The payer's bank or intermediary banks may charge their own fees.

Card payments in a foreign currency are free from HALO. Overseas ATM withdrawals may have a free allowance and then a percentage fee, which is shown in the fee schedule.
